

[SOLA to Present at The Bioprocessing Summit](#)

Dates: August 21 - 25, 2017 | Westin Copley Place, Boston MA

[Booth] #609

[Presentation] Thursday, August 24th at 5:15 pm

Title: "TapBoost® Technology: Enhanced Protein Production by Improved Protein Folding System"

Presenter: Akinori Hishiya, Ph.D., Principal Scientist, Co-Founder, Biology, SOLA BioSciences

Therapeutic recombinant proteins produced using mammalian expression systems often have misfolding issues. SOLA has developed a novel technology called TapBoost® technology, which assists proper protein folding systems, especially for a targeted protein. TapBoost® has enhanced the production of many therapeutic recombinant proteins including monoclonal antibodies and Fc-fusion proteins.

THE **BIOPROCESSING** SUMMIT
AUGUST 21-25, 2017 | WESTIN COPLEY PLACE | BOSTON, MA
